PERSONAL PROFILE

Junior Web Developer with practical experience across the MERN stack and PHP Laravel, having built 4 complete web applications including role-based platforms with secure, JWT-authenticated APIs. Gained 6 months of industry experience at MAVA Technologies developing full-stack modules, responsive React.js frontends, and maintaining structured deployment workflows within a shared Git repository. Strong foundation in MVC architecture and database design (MongoDB, MySQL, PostgreSQL), currently being deepened through the APTECH ACCP Prime 2.0 Software Engineering track.

KEY SKILLS

Front-End: React.js, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Bootstrap

Back-End: Node.js, Express.js, PHP, Laravel

Databases: MongoDB, MySQL, PostgreSQL

CMS & eCommerce: WordPress, Shopify

Tools: Git, GitHub, Docker, Postman, Firebase, JWT Authentication, RBAC, MVC Architecture

WORK EXPERIENCE

Junior Web Developer | MAVA Technologies

Nov 2024 – Apr 2025 · Remote / On-Site

- Developed and delivered full-stack modules across 2 tech stacks (MERN and Laravel), covering JWT authentication and database integration.
- Built responsive React.js frontends consuming team APIs; maintained clean version control across a shared Git repository with regular code reviews and structured deployment workflows.

PROJECTS

EventSphere — Expo Management Platform | MERN Stack

- Architected a 3-role platform (Admin / Exhibitor / Attendee) with exhibitor application and approval workflow, dynamic booth allocation from an interactive floor plan, session scheduling with 5+ configurable time slots, and access control enforced at the API level rather than the UI alone.

Covid Test & Vaccination Booking System | PHP Laravel · MySQL

- Built a 3-role appointment system (Admin / Hospital / Patient) handling end-to-end patient flow, including booking requests, hospital approvals, test result updates, vaccination status tracking, and exportable date/week/month-wise reports.

Hotel Management System | MERN Stack

- Developed a real-time hotel operations platform with 2 role-based dashboards (Admin and Staff), live room availability tracking, full booking management, and JWT-secured API layer with modular backend architecture.

Maverick Dresses — eCommerce Website | HTML5 · CSS3 · JavaScript · Bootstrap

- Delivered a fully responsive single-page application for a school uniform manufacturer featuring 10 product categories, embedded Google Maps for outlet location, live visitor counter, and smooth animated navigation.

EDUCATION

APTECH Certified Computer Professional (ACCP Prime 2.0) *In Progress – Expected Sep 2026*

Software Engineering track, progressing from foundational web development to advanced full-stack application development.
